

Vertical Communication Power Supply Cabinet along the Belt and Road

Overview

What is communication equipment?

Communication equipment is defined as anything other than a horizontal or vertical communication line attachment. When equipment is to be installed on a non-Medina EC owned pole, the pole shall be installed parallel to the Medina EC pole at a minimum distance evaluated on a case-by-case basis from the nearest supply conductor by Medina EC.

Which side of a transformer pole should a communication service drop be located?

same side of the pole (no boxing in of poles).6.7.On transformer poles, the communication service drops shall be located so that they come from the messenger on the side of the pole opposite the transformer, so that the trans.

How close should a sidewalk communication anchor be to a pole?

3.7.10.3 No Sidewalk Communication anchor shall be installed closer than 6 feet from the surface of the pole. 3.7.11 Dead-Ends: At dead-ends with spans in each direction from the dead-end structure, the unbalanced pull used to design the structure shall not be the difference in tensions.

How do you mount a power supply enclosure?

If no Electric supply device exists, mount enclosures in line with the overhead primary conductors and under the primary crossarm. In the absence of a crossarm, mount enclosure under the primary conductor, on the gain (i.e. flat surfaces for mounting) side of the pole. No closer than 5 inches from the surface of the pole.
