

Vilnius new energy solar battery cabinet lithium battery pack

Overview

Why does Lithuania need reliable energy storage?

Uloza pointed to the growing demand for reliable energy storage as Lithuania's renewable energy sector expands.

How much electricity does Lithuania use?

"Although the average electricity consumption in Lithuania is around 1,500 megawatts, the installed capacity of both solar and wind power plants is expected to exceed 2,000 megawatts in 2025, enabling surplus electricity to be stored and supplied to consumers during peak hours," he noted.

Does SoliTek work with a virtual power plant?

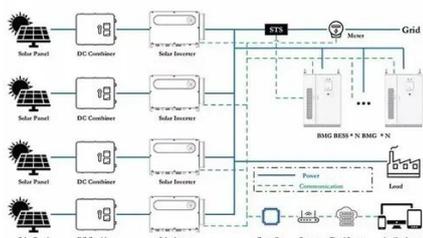

It can be paired with any virtual power plant, according to the manufacturer. Solitek was founded in 2009 and is part of the BOD Group, a family-owned conglomerate of high-tech companies. It entered the battery storage market last year with the launch of its 5.12 kWh NOVA residential smart battery system.

How is SoliTek high-voltage battery system made?

The high-voltage system utilizes lithium-iron phosphate (LFP) battery cells. The battery modules integrated into the product are manufactured on SoliTek's automatic production line in Vilnius with an annual output of 350 MWh. The company aims to scale up its battery storage manufacturing capacity to 1 GWh.
