Batteries are essential for guaranteeing that residential and commercial buildings can be driven by renewable energies even when the sunlight has set or the wind has ceased blowing. Distributed energy storage systems can enhance grid resilience and be a backup strategy during power outages in.

The Mini C&I Energy Storage System is a compact, all-in-one solution designed for large residential and light commercial applications (3Ph 220/380, 230/400Vac @60Hz). It supports a wide range of use cases including microgrids, backup power, off-grid operations, peak shaving, time-of-use.
