

# Wholesale of grid-connected photovoltaic cell cabinets for port use

## Overview

---

What is a photovoltaic grid-connected cabinet?

Photovoltaic grid-connected cabinet is a distribution equipment connecting photovoltaic power station and power grid, and is the total outgoing of photovoltaic power station in the photovoltaic power generation system, and its main role is to act as the dividing point between the photovoltaic power generation system and the power grid.

How can Lt be used in a photovoltaic power generation system?

Fixed installation, large space, good heat dissipation. It can be used in solar photovoltaic power generation systems, and can also be used to convert, distribute and control electrical energy between photovoltaic inverters and transformers or loads.

What is a GGD AC low-voltage distribution cabinet?

For low-voltage solar power stations that are connected to the grid, the PV grid connected cabinet can also incorporate additional devices for functions like measurement and protection. GGD AC low-voltage distribution cabinets are suitable for power plants, substations, and industrial enterprises.
